M E

Light Build, Elastic Scale

MUSEPoD

The era of fixed-function spaces is drawing to an end.

Modern office and educational spaces lean toward openness and sharing, where diverse activities such as individual work, communication and collaboration take place side-by-side.
Conventional civil construction suffers from long lead-times, high costs and inflexibility. Single-unit pods cannot deliver both private focus and open dynamism.

This is where the ME Series comes in. Flexible modular units combine to meet multi-scenario composite demands and form a complete ecosystem. Spaces are no longer static building elements. Rapid assembly and iteration create dynamic zones for diverse activities, establishing a new-generation space paradigm that evolves continuously.

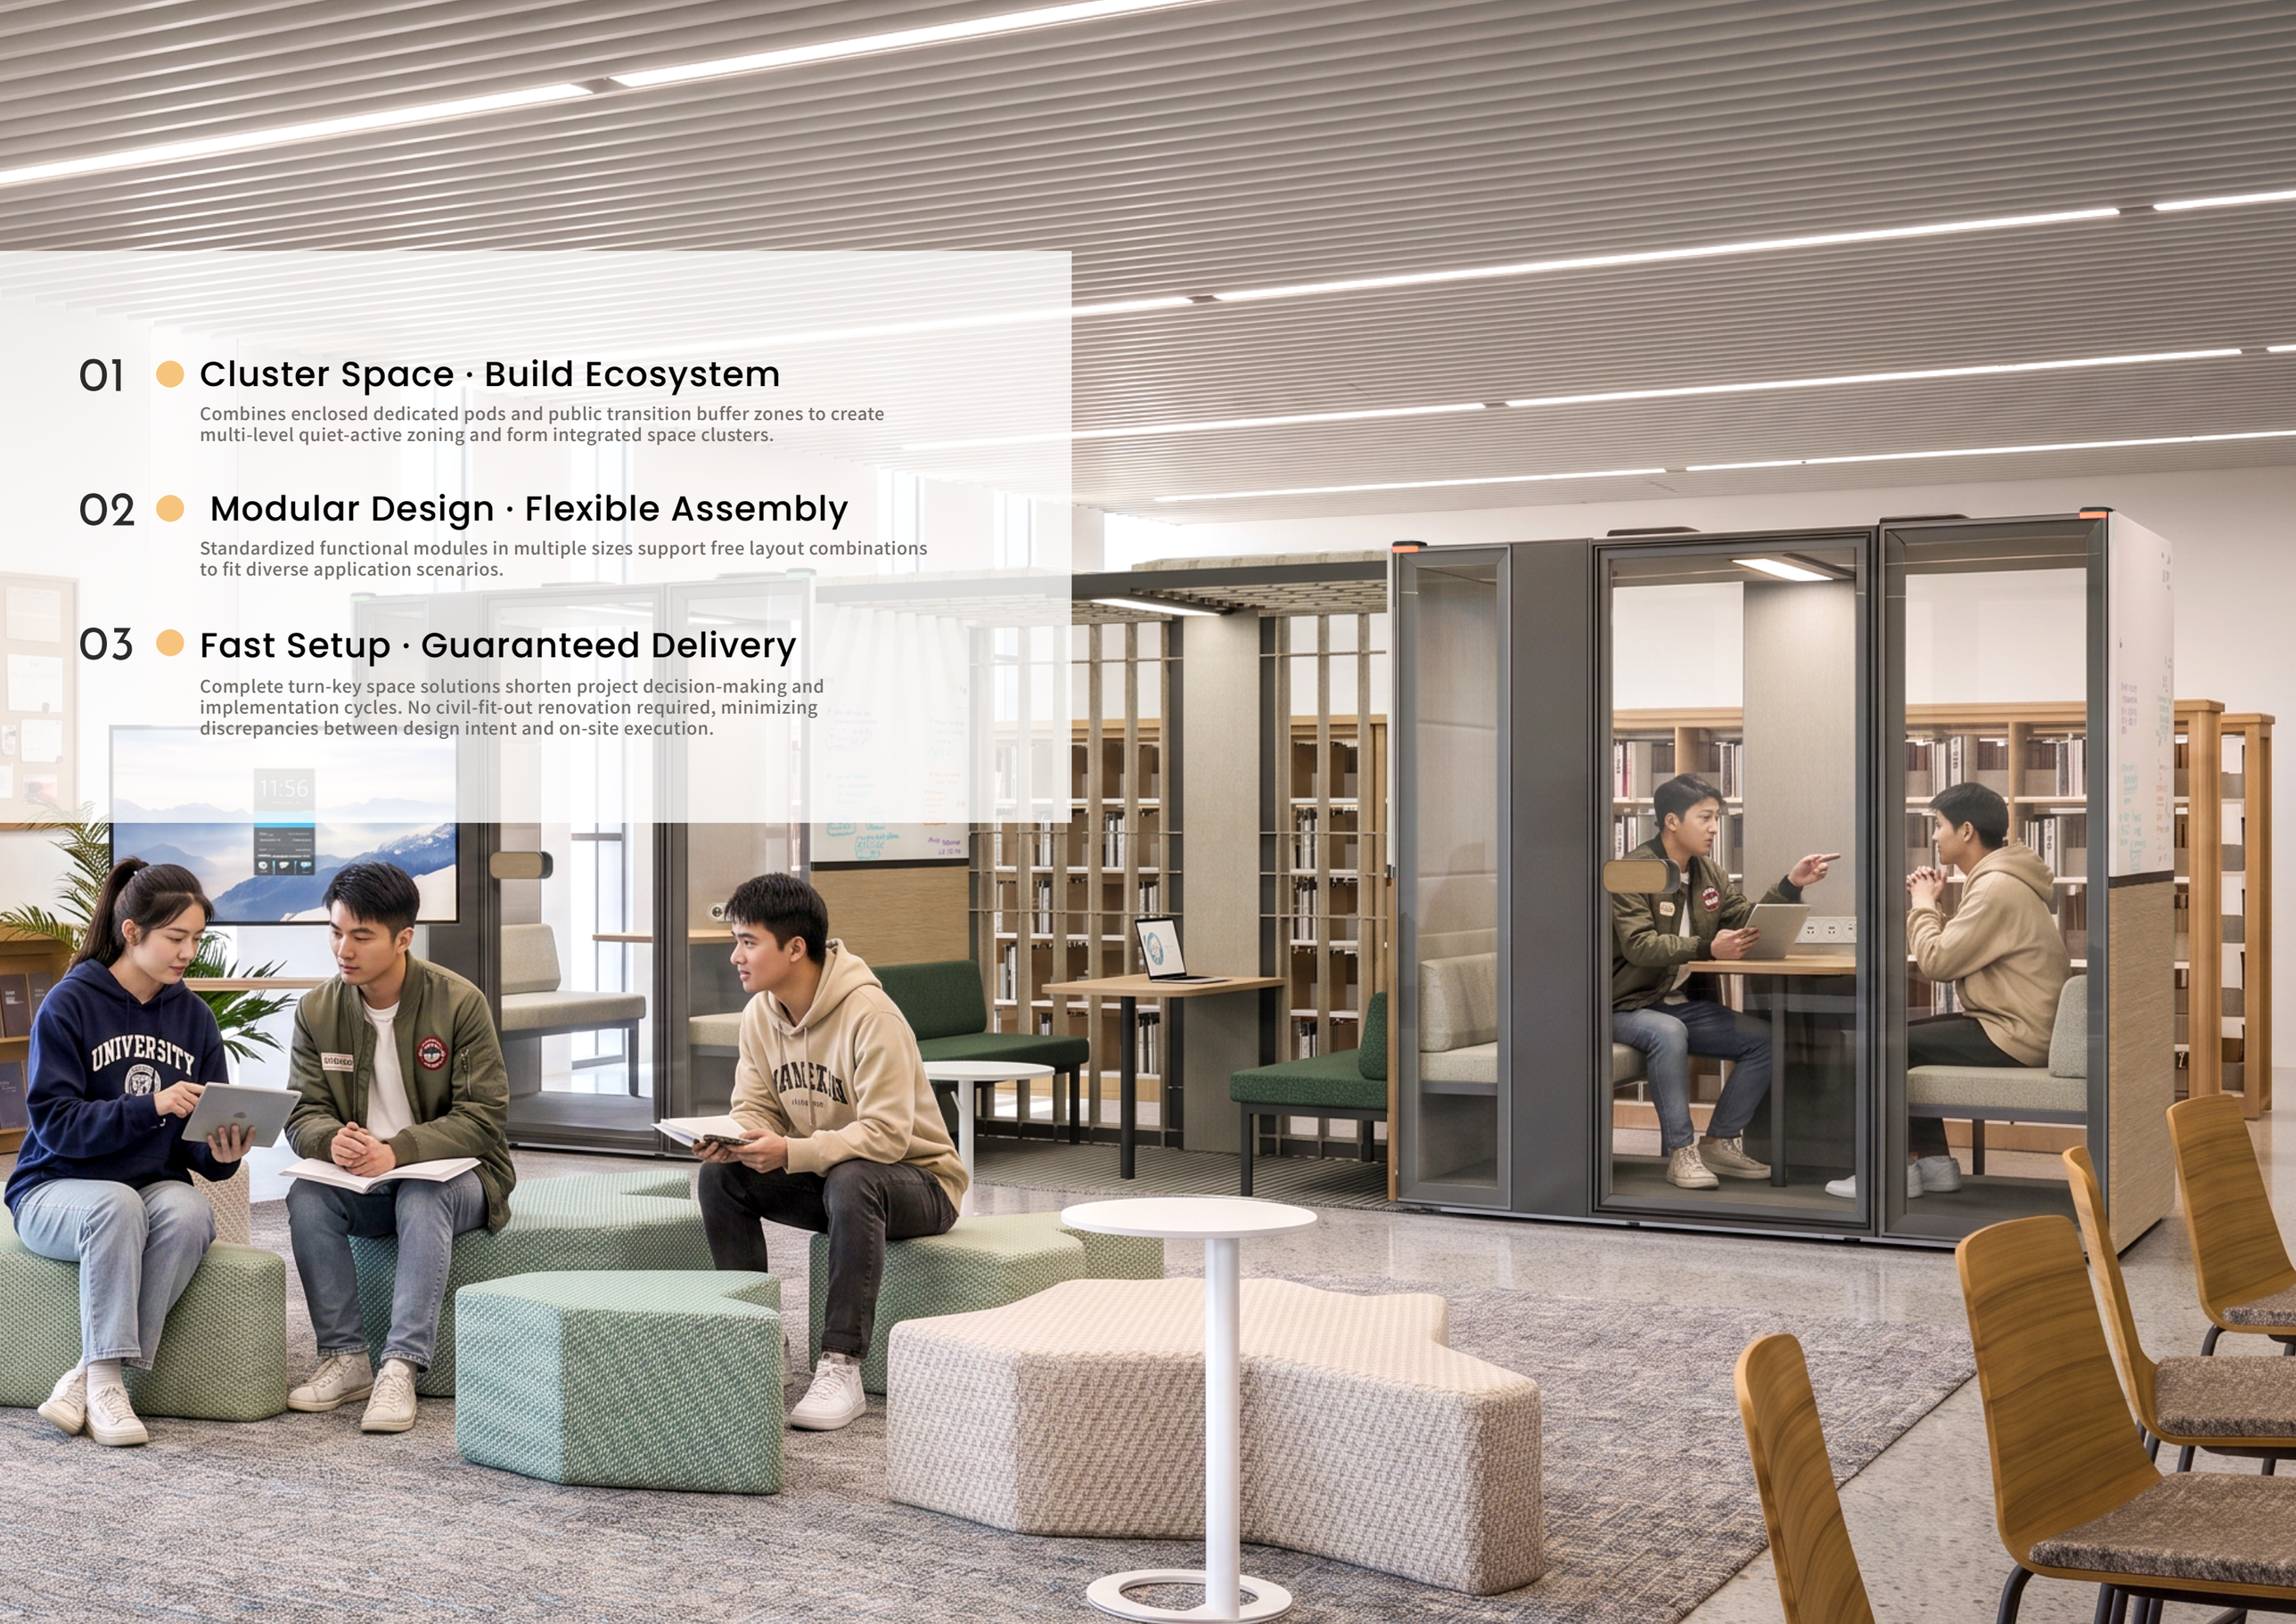

INDEX

Design Highlights 3

Core Advantages 5

Application Scenarios 11

Product Introduction 19

01 Cluster Space · Build Ecosystem

Combines enclosed dedicated pods and public transition buffer zones to create multi-level quiet-active zoning and form integrated space clusters.

02 Modular Design · Flexible Assembly

Standardized functional modules in multiple sizes support free layout combinations to fit diverse application scenarios.

03 Fast Setup · Guaranteed Delivery

Complete turn-key space solutions shorten project decision-making and implementation cycles. No civil-fit-out renovation required, minimizing discrepancies between design intent and on-site execution.

Product Features

1.Smart Connected Interaction

Multi-dimensional smart configurations including motion sensing, status indication, integrated control, booking management and data analytics connect physical spaces with digital management, catering to operation needs of future-oriented smart venues.

Uniform Eye-friendly Lighting

External screen clearly displays occupancy status, temperature, humidity, CO_2 level and upcoming bookings. Scan the QR-code on screen to reserve the pod instantly.

Superior Air Quality

Four-colour LED indicates idle, occupied/under-cleaning and fault status. Users can check availability from across the corridor. Countdown timer for reservations eliminates inefficient door-knocking checks.

Quiet Private Sanctuary

Turn the knob to switch modes and press to confirm. Lighting and fan adjust synchronously. Outer ring LED shows working status, enabling easy blind-operation without looking down.

Product Features

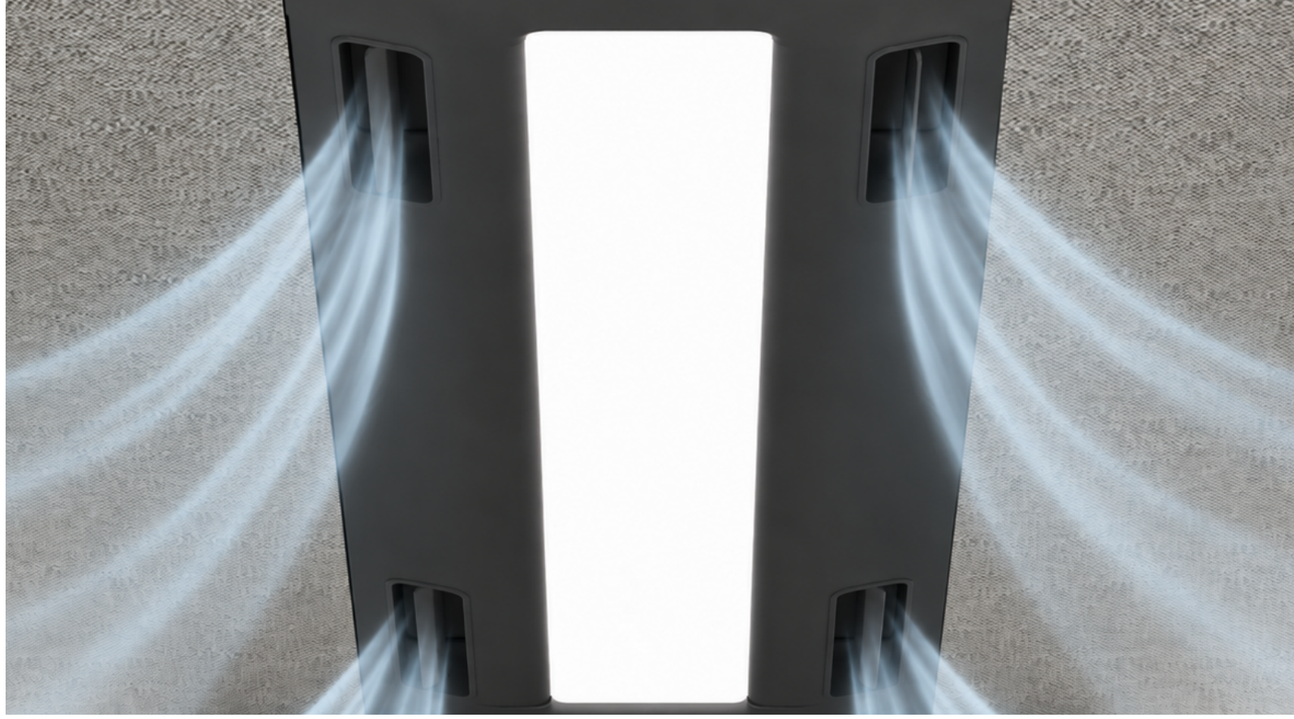

2.Human-Centred Comfort

Complies with ISO23351 international standard and achieves top-tier CLASS-A performance. Full-pod air exchange completes within 1-1.5 minutes with adjustable wind direction & airflow to ensure premium indoor air quality. Soft anti-glare lighting delivers gentle illumination for immersive work & study.

Uniform Eye-friendly Lighting

Integrated soft anti-glare lighting module delivers even, gentle light for eye comfort.

Superior Air Quality

Full-pod air recirculation in 1-1.5 min keeps interior air fresh continuously.

Quiet Private Sanctuary

ISO23351 CLASS-A acoustic performance creates quiet private zones shielded from outside disturbances.

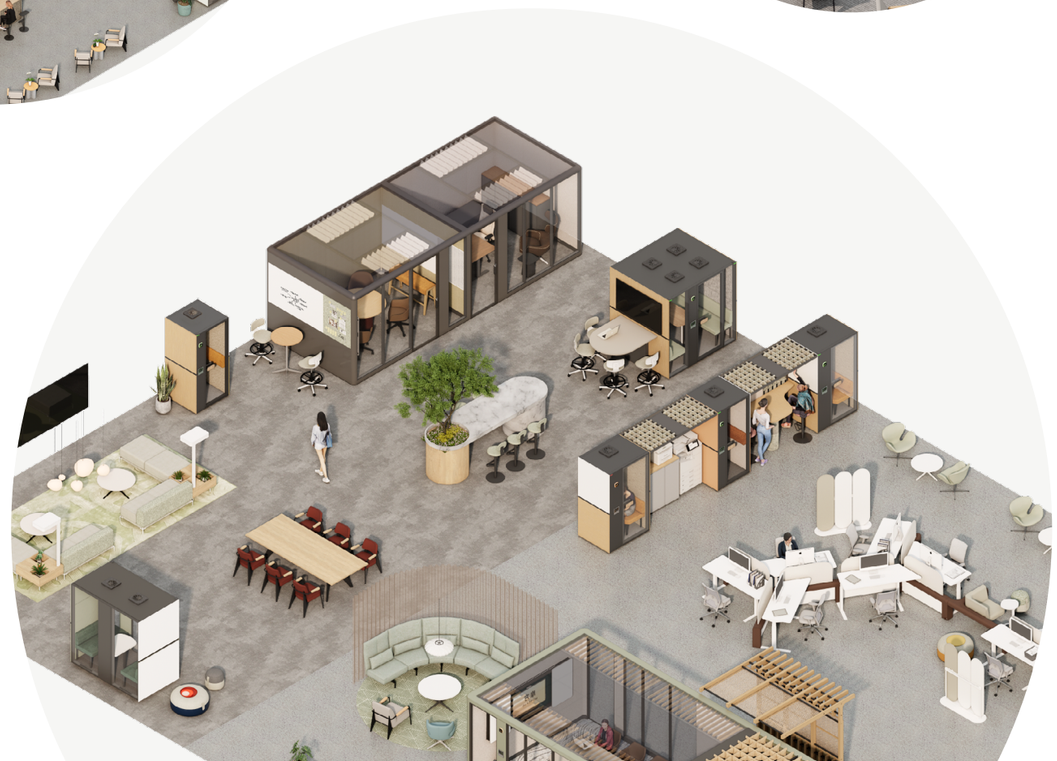

Product Features

3.Adaptable Asset Value

Built on ESG principles and GreenGuard-certified for environmental performance. Its scalable modular architecture allows layout reconfiguration according to business changes across scenarios, improving space-use efficiency and asset reusability.

SENARIoS

Office

Work modes keep changing in open-plan offices.
Modular ME-Series creates dynamic work buffers, covering full scenarios: calls, focus work, consultations and workshops.
Free from civil renovation, it flexibly adapts to diverse work patterns.

9:00 Business Call Pod

10:30 Creative Focus Pod

12:30 Work Transition Pod

14:00 Team Collaboration Pod

16:30 Idea Exchange Pod

Campus

Campus learning balances individual research and group co-creation.
ME-Series builds flexible learning spaces for one-stop support of self-study, training, seminars and online courses.
Modular layout evolves with teaching to fit the relaxed-intensive learning rhythm of teachers and students.

Morning · Language Pod

Pre-Noon · Self-study Pod

Afternoon · Seminar Pod

Afternoon · Learning Pod

Evening · Open Study Pod

Collaboration / Seminar

Supports diverse group-based learning.
Provides space for interdisciplinary teamwork,
project incubation and inquiry-based activities.

Private Reception / Waiting

Enables private interviews and communications within public areas, creating independent enclaves in open-plan surroundings.
