MP2.0

No Need to Search. Space Comes to You.

MUSEPoD

MP2.0 | Intelligent Spaces That Adapt to You

Work is no longer defined by a desk or a meeting room. As the way we work becomes more dynamic and diverse, spaces must evolve with it.

MP2.0 is more than a pod that blocks out noise. It marks a shift from Artificial Intelligence (AI) to Spatial Intelligence (SI), creating an intelligent space system that understands your needs, adapts to each task, and can be managed sustainably.

MUSEPoD

The new generation of MP2.0 smart space pods combines a timeless design with an intelligent user experience. Six core advantages - sound, light, smart technology, power, air, and human-centered design - work together with smart booking, real-time status synchronization, and back-end management to make use more convenient and space scheduling more efficient. Clean lines and carefully considered details suit settings from private focus work to group collaboration, including offices and educational environments. The result combines refined quality with intelligent space management, giving every session of focused work and conversation an appropriate place.

Smart Ready Before You Arrive

Remote Booking via App | Synchronized Screen Display | Back-End Data Management

Human Effortless Access

ADA-Compliant Accessible Door Frame | One-Touch Door Opening
| U-Shaped Handle | Automatic Magnetic Door

Sound Quieting the World
Class A Sound Insulation Tested to ISO 23351-1| External Acoustic Shield
Active Noise Reduction Technology

Light Awakening Inspiration

Millimeter-Wave Radar Sensing with a 3-Second Soft Fade-In
| 3000-8000K Natural Warm Light

Power Ready for Any Task

Integrated Modular Power Outlet System

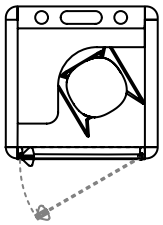

Air Breathe Freely
Integrated All-in-One Air Circulation System

MFC

- Warm Wood MFC-02
- Lunar White MFC-01

SENARLOS

Applications Office

Leave behind the noise and distractions of an open-plan office. Intelligent design and professional acoustic performance create an efficient, private workspace within the office, allowing remote communication and deep focus to proceed without interruption.

Applications Cafe

Even in the relaxed atmosphere of a cafe, a quiet space can support focused conversation.

Smart comfort and effective sound insulation create an ideal setting for business discussions and casual social interaction, giving every conversation both efficiency and warmth.

Leading a new world of plug-and-play smart spaces.
